

We simplify the world of documents

OptimiDoc
is the smart
and environmentally
friendly office
of the future

ABOUT US

We bring innovation in the world of digitalisation and document printing

OptimiDoc has been developing print optimisation and document digitalisation solutions for more than eight years.

Cooperating with our partners, we are pioneers in new features and approaches that shape the whole industry. This is the only way to draw on our expert knowledge and offer our customers an innovative view of how document administration and digitalisation shall work.

OptimiDoc

OPTIMIDOC TECHNOLOGY SOLUTION

For one or
thousands
devices

SERVER

Do your standards prohibit a cloud solution? Our OptimiDoc team will customise the solution to your requirements and strict standards.

We have a server-based implementation solution for you: intelligent document digitalisation and print management for your IT needs.

Document digitalisation

Routine daily document digitalisation under control

Documents transfer

Cloud storage digitization

External data digitization

Image quality improvement

Barcode recognition

Documents separation

Zone OCR

And many others

OptimiDoc allows easier and quicker digitalisation of documents on any device.

OptimiDoc processes individual digitalisation tasks and allows storage in a selected digital archives or cloud storages. Sending of e-mails to the inbox of selected users is a matter of fact.

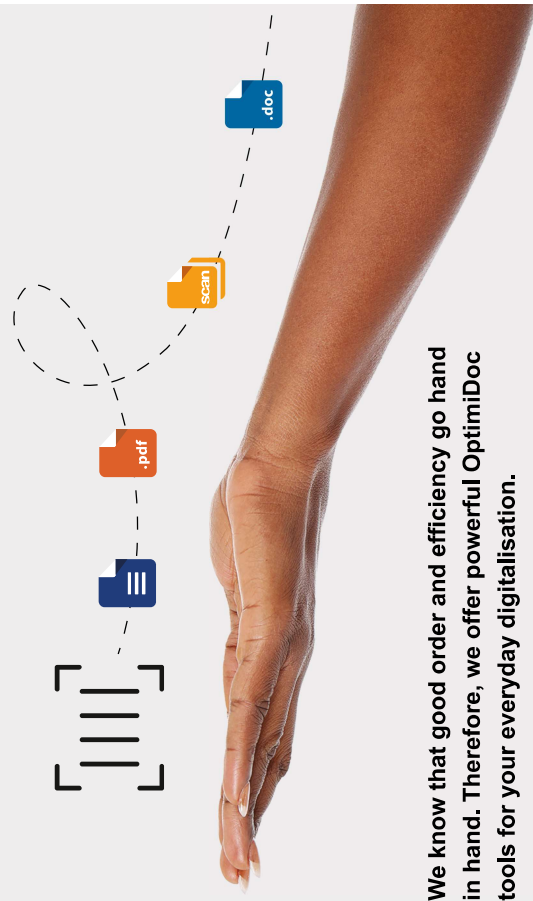

OptimiDoc digitalises documents precisely and easily

OptimiDoc digitise printed documents in various formats. You choose the digitalisation process from the touch panel on your multifunctional printer.

Documents are precisely and accurately digitalised and sent automatically to a selected storage site such as e-mail, FTP, Google Drive, Dropbox, OneDrive or SharePoint.

We digitalise documents in any format sent to any location

We know that good order and efficiency go hand in hand. Therefore, we offer powerful OptimiDoc tools for your everyday digitalisation.

It raises the productivity and performance of your employees

Device lock

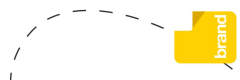

Access right

Cloud storage print

Pull print

Print management

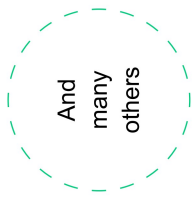

Device status monitoring

Print operations monitoring

On device print management

And many others

It makes printing of documents on any device easier and faster regardless of where the print job was sent.

It administers individual print tasks and allows you to set the final shape of the document directly on the device. You can send documents for printing from your smartphone.

**Saves up to 30%
of printing costs**

**This is how much unauthorised printing is done or
what the result of neglected print control is.**

These figures come from analysing tens of thousands
of printing devices and OptimiDoc reports.

**Sustainability is
not just our vision,
it is our reason
to go on**

It responds to the growing needs for document digitalisation and print management. It makes work for individuals and offices easier, saves time and reduces costs and large infrastructure of institutions. **All this in an environmentally friendly way.**
