SAFEQ™
WORKFLOW
SOLUTIONS PLATFORM

Today's organizations are looking for ways to work smarter when implementing enterprise office solutions. Reducing costs, improving productivity and increasing the security of content are concerns no matter where an organization is on its print management and digitization journey.

Working smarter also means simplifying the approach when deploying solutions. Y Soft understands these needs and introduces the most comprehensive and flexible platform yet for companies of any size.

The YSoft SafeQ platform is a workflow solutions platform designed to meet the growing needs of organizations looking to effectively manage and reduce print services costs across 2D and 3D fleets, to create more efficient, digital workflows and to increase document security.

A MODULAR PLATFORM

The YSoft SafeQ platform offers comprehensive enterprise print management and document capture workflows through a choice of easy-to-use, easy-to-deploy software suites. Each suite is modular – an organization can choose an entire suite or just the suite modules that are right for them today. Adding more features from one suite to another suite is easy. As some modules are shared among suites, you never pay twice when adding features.

In addition, each suite uses consistent distributed architectural design, embedded terminals and management interfaces which means moving from module to module and suite to suite is simple.

INDUSTRY INNOVATIONS

While other solutions require multiple servers, contracts and help desk systems to deliver both print management and document capture, which increases your total cost of ownership, Y Soft offer a seamless, integrated solution.

YSoft SafeQ is also the first fully-featured enterprise print management solution offered across 2D and 3D print fleets.

THE YSOFT SAFEQ PLATFORM SUITES

YSoft SafeQ is integrated within the display panel of the world's most popular brands of MFDs (multifunction devices). The YSoft SafeQ Platform is offered in a choice of four modular suites.
